

Implementing an Environmental Management System

Course Description: BSI's "Implementing an Environmental Management System" course provides students with the knowledge to implement and manage an environmental management system (EMS) appropriate to the needs of their organizations. Students gain the necessary tools and skills to help them successfully develop the key processes, controls, and documentation for an effective EMS. Knowledgeable instructors guide students through the implementation stages, and group exercises give students practice in implementation activities.

Learning Objectives:

- Understand environmental management definitions, concepts, and guidelines
- Understand the purpose of the ISO 14000 series
- Understand the requirements of the ISO 14001:2004 standard
- Identify aspects and impacts
- Write an effective environmental policy
- Identify and plan for required resources to implement an EMS
- Understand the implementation stages
- Understand required documentation and records
- Learn best practice implementation techniques

Course Materials: **Students receive comprehensive course manuals with reference materials.**

Who Should Attend:

- Managers responsible for environmental or health and safety management
- Project managers
- Individuals tasked with developing and implementing an EMS relevant to their organizations

Duration: **Course times:**

- Day 1: 8:00 am – 5:30 pm
- Day 2: 8:00 am – 5:30 pm

Prerequisite: There is no formal prerequisite for this course. Familiarity with ISO 14001:2004 or environmental management systems would be beneficial.

Course Logistics: Certificates of attendance are provided at the conclusion of the course.
