

Course Description: BSI's "ISO 14001:2004 Requirements" competency-based 2-day course is designed to provide students with a basic knowledge and a degree of comfort with ISO 14001:2004. Students gain a working understanding of key environmental management concepts, such as aspect and impact identification and setting objectives and targets. The course structure incorporates presentations and interactive discussions. An experienced instructor explains the ISO 14000 series of standards in detail and includes auditing the requirements of the standard. Students learn by participating in group exercises and in-depth discussions.

This course covers the RABQSA TPECS EM – Environmental Management Systems Competency Unit whose outcomes are certified by RABQSA. Attendees successfully completing this course receive a Certificate of Attainment for this RABQSA Competency Unit.
