

Becoming a Lead Auditor for ISO 9001, ISO 14001, and OHSAS 18001 just got easier! Our 5-day course has been both improved and streamlined into a new 4-day format.

Our 4-day ISO 9001, ISO 14001, and OHSAS 18001 Lead Auditor courses are certified by the RABQSA through its Training Provider and Examiner Certification Scheme (TPECS) program. The TPECS program is more focused on competency and allows more flexibility on content and duration. It is designed to reflect innovative learning and assessment practices, as well as to demonstrate that students achieve the level of knowledge needed for RABQSA personnel certification. Students successfully completing our new 4-day Lead Auditor course receive a Certificate of Attainment for each of these RABQSA knowledge competency units:

QM - Quality Management Systems

AU - Management Systems Auditing

TL - Leading Management Systems Audit Teams

OH - Occupational Health and Safety

EM - Environmental Management Systems

Exams are given at the end of each competency unit. Certificates of Attainment are provided to students who are deemed "Competent" for each competency unit. Certificates of Attendance are provided to students that do not pass a competency exam and they are given an opportunity to retake the exam.

Requirements/Understanding (2 days)

Pick One:

- Quality Management System (QM)
- Environmental Management System (EM)
- Occupational Health and Safety (OH)

2 days

Internal Auditor (3 days)

Pick One:

- Quality Management System (QM)
- Environmental Management System (EM)
- Occupational Health and Safety (OH)

2 days

Management System Auditing (AU)
1 day

Lead Auditor Training (4 days)

Pick One:

- Quality Management System (QM)
- Environmental Management System (EM)
- Occupational Health and Safety (OH)

2 days

Management System Auditing (AU)
1 day

Leading Management
Systems Audit Teams (TL)
1 day

As an example, after successful completion of the 2-day QM module, you can then take the 1-day AU module to complete Internal Auditor training. To become a lead auditor, you can take the final, 1-day TL module.

Do you need to be a lead auditor for ISO 14001 or OHSAS 18001? The final two modules (AU and TL) are the same for each system. For ISO 14001 you will just need to take the first module specifically designed for Requirements of Environmental Management Systems (EM). For OHSAS 18001 you need to take the first module specifically designed for Requirements of Occupational Health and Safety Management Systems (OH).
